342 shovel. A coping of bricks is then laid out around the roof, leaving room for the gutters which spill into the streets. These houses may be topped with a second roof, a thatched cone. The four chief timbers are set at the four angles of the house. There is a door in the first ceiling, and precious goods or objects are kept in this part of the house. As in the round huts, the door always opens to the south.

The outside of the houses are plastered with earth mixed with [237] cow dung; on the inside, the floor and lower part of the walls are daubed with black earth mixed with fresh cow manure and bark from [824] the jumbo tree (Napoleona Heudelotii); the upper walls and the ceiling are covered with white river clay. Where the two colors meet, [531] lines of festoons traced with the finger symbolize the descent of the third Word. On the white walls are painted ladders, calabash spoons, animsla, signs conveying [102] the worldly situation of the owner as well as the soul of the artist.

[356] The periphery of the entrance door is daubed with fresh cow [769] dung every 15 days, and more liberally with rotted cow dung once a year before the rains. This custom is linked to ancestor worship.

Canari [earthenware vessels] containing certain plants are 353 buried under the bed of the head of the family; other plants and 352 juice from roots are hidden under the women's beds. The boli are hooked to the roofing of the houses for they must touch neither earth, water, nor fire. Nets, diakumadjulu, are hung from the ceiling; they hold clothes or calabashes for the food; mats or animal skins are spread on the ground; beds, different-sized calabashes, and stools complete the furnishings. The different huts belonging to one family 351 are surrounded by a wall that opens into the vestibule of a hut with 342 two doors, oriented north-south. This is where the head of the family receives strangers. In the inside court are found hearths made [354] of three stones, mortars for millet, and chicken coops, a sort of small square hut made of clay mixed with straw. The granaries, 343 constructed on piles, have the form of round huts. They are divided 251 into four parts, where the four principal grains are kept: millet, rice, fonio, ground nuts. Some grains may be kept together in the same compartment, for example, millet and ground nuts. Certain granaries, bonio, are veritable cigar-shaped pots made by the blacksmiths' wives. When the bonio is finished, it is cut into sections
